

Our client is a manufacturing facility approved by the Board of Investment of Sri Lanka. To ensure their continued growth and success, they wish to recruit a motivated and commercially astute individual for the following position.

MAINTENANCE ENGINEER

The selected candidate's role is vital to the manufacturing process's efficiency, development, and progress.

Job Profile

- Be responsible for all the maintenance activities of machinery, equipment, and factory buildings; ensuring industrial machinery and equipment run smoothly and reliably.
- Carry out studies and implement continuous improvement to enhance efficiency of machinery.
- Draw up preventive maintenance programmes to maximize efficiency and minimize breakdowns.
- Schedule and undertake periodic maintenance on all electrical equipment, components and installations.
- Ensure continuous cover for the machinery and equipment in case of breakdowns.
- Ensure smooth functioning of electronic systems including PLC systems.
- Maintaining a safe and healthy work environment by establishing, following, and enforcing standards and procedures, complying with codes and legal regulations.
- Achieving electrical engineering operational objectives by contributing electrical engineering information and recommendations to strategic plans and reviews; preparing and completing action plans.

Qualifications and Experience

- Should possess a BSc. degree in Electrical or Mechanical Engineering from a recognized university.
- A minimum of 5 years of experience preferably in Maintenance Engineering in a manufacturing setup with exposure to Electronic Engineering would be a definite advantage.
- Age below 45 years.

This position offers an excellent career opportunity for development in a pleasant working environment with a competitive salary package and with long term potential.
